

Wireless Wall Console

Completely wireless installation. Enhanced functionality.

- **Absolutely no wiring required for operation!**
No need to have an additional wired wall console.
- **Large buttons and blue LED light** make the console easy to see in the dark.
- The pulsating light has two optional speeds or can be turned off for maximum battery life.
- **Backlighting turns red** to notify user of low battery.
- Turn only the opener light on at any time for steady light in the garage.
- The delay button allows a user an extra 10 seconds to exit before the door begins to move. Press button up to three times for a maximum of 30 seconds delay before door movement.
- Works with all Overhead Door® CodeDodger® equipped openers manufactured since 2013. Not compatible with Legacy® 800 Model 2026 or Standard Drive® 600 Model 1026.

Includes (2) AAA batteries, (2) #6x1.25 Phillips screws and (2) #6-#7 drywall anchors.

The Genuine. The Original.
